

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

Correspondence Solicited.

Limes, Cements, Concretes, Mortars, Etc.—Limes are divided into the following classes: Rich, fat or pure limes, poor limes, hydraulic limes, and cements. They are made by heating limestone to redness in air. Cements are divided into two classes, natural and artificial cements. Natural cements are burnt direct from stone containing from twenty to forty per cent of clay. A greater proportion of clay added to moderately burnt stone artificially prepared, makes artificial cements. Ordinary mortar is composed of lime and sand mixed into a paste with water. When cement is substituted for lime, it is called cement-mortar. Concrete is made by mixing lime or cement with sand, water and some hard material such as broken stone, burnt clay, bits of clay, etc. Gypsum is the basis of most plasters. Plaster is produced by the gentle calcination of gypsum to a point short of the expulsion of all moisture, and when ground it is called plaster-of-Paris. Plaster is laid on the walls in successive coats. Asphalts are combinations of bitumen incorporated with limestone. White-wash is made from pure white unslaked lime mixed with water, and is improved by the addition of tallow.

## WILSON ADJUSTABLE CHAIR.

### A Woman's Best Fortune.

Beauty is admittedly a woman's best fortune, and she should do all that nature and art can apply to preserve it. There have been many beautifiers invented and discovered, but with the exception of Dr. T. Felix Gouraud's Oriental Cream they are useless, and, in some cases, noxious. It has stood the test of thirty years, and has been used by hundreds of thousands of ladies who owe to it the preservation of their charms. It is absolutely harmless, and never fails to remove tan, pimples, freckles, moth patches, rash and skin diseases, and every blemish on beauty, and defies detection. The Oriental Cream is sold by all druggists and fancy goods dealers. It can be had at R. H. Macy's, Stern's, Ehrich's, Ridley's and other fancy goods dealers. Dr. Gouraud's *poudre* *subtile* will be found to remove superfluous hair without pain or injury to the skin. It is invaluable.—*New York Democrat*.

Are unequalled for smooth, tough leads.

If your stationer does not keep them, mention DECORATOR AND FURNISHER, and send 16c. in stamps, to Joseph Dixon Crucible Company, Jersey City, N. J., for samples worth double the money.

How Do Pearls Grow?

Professor Quirkett seems to believe that all pearls are produced by the boring of small animals through the shell, and the pushing forward the inner plate of nacre so as to irritate the animal. That pearls can be produced in this way there is no doubt; that all pearls are produced in this way I doubt very much.—*Notes and Queries, second series, sixth vol.*

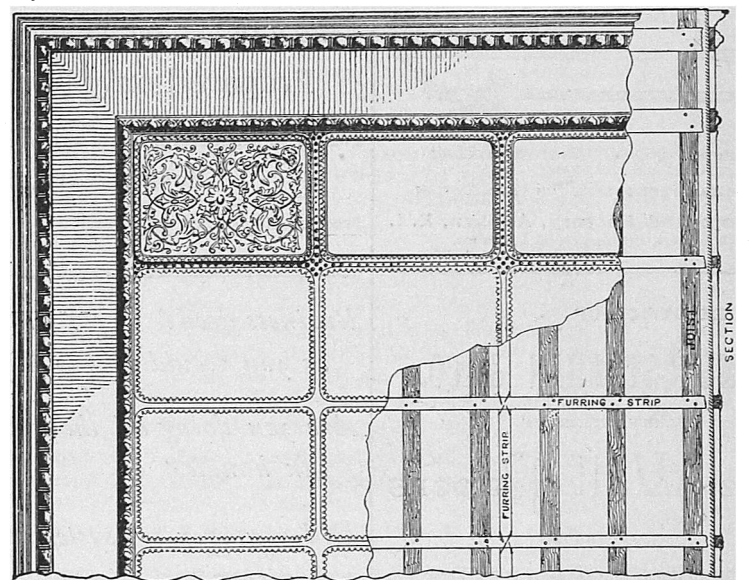

Breeding Pearls.—Nearly five years ago, while staying with some kind friends in Pulo, Penang (Straits of Malacca), I was shown by a lady resident, wife of a merchant of high position in this island, some five ordinary looking small pearls, which had increased and multiplied while in her possession. She had set them aside for about a twelvemonth in a small wooden (screw) box about two and a half inches broad, and one and a half inches high, they were packed in soft cotton, and accompanied by half a dozen grains of common rice. On opening the receptacle at the expiration of the above time she found four additional pearls. These I myself saw and examined not long after the lady had made the discovery, beautiful little things they were, and about the size of a pin's head.—*Notes and Queries, third series, second vol.*

Cleopatra's Pearls.—A convincing proof of the ability of the ancients in chemistry is the experiment with which Cleopatra entertained Antony by dissolving before him, in a kind of vinegar, a pearl of very great value (about £45,450 sterling). At present we know of no vinegar that can produce this effect; but the fact is well attested. Probably the queen added something to the vinegar, omitted by the historian.—*Hone's Every Day Book.*

# THE STEREO RELIEF DECORATIVE CO.,

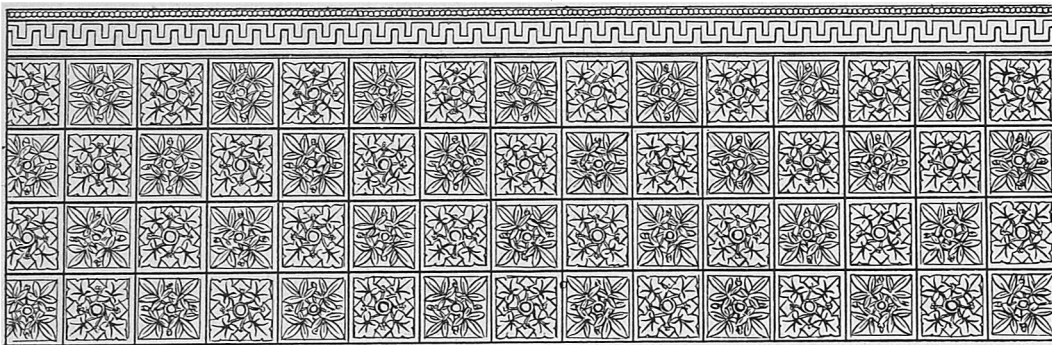

PATENTEES AND MANUFACTURERS OF

## STEREO RELIEF CEILING AND WALL DECORATIONS,

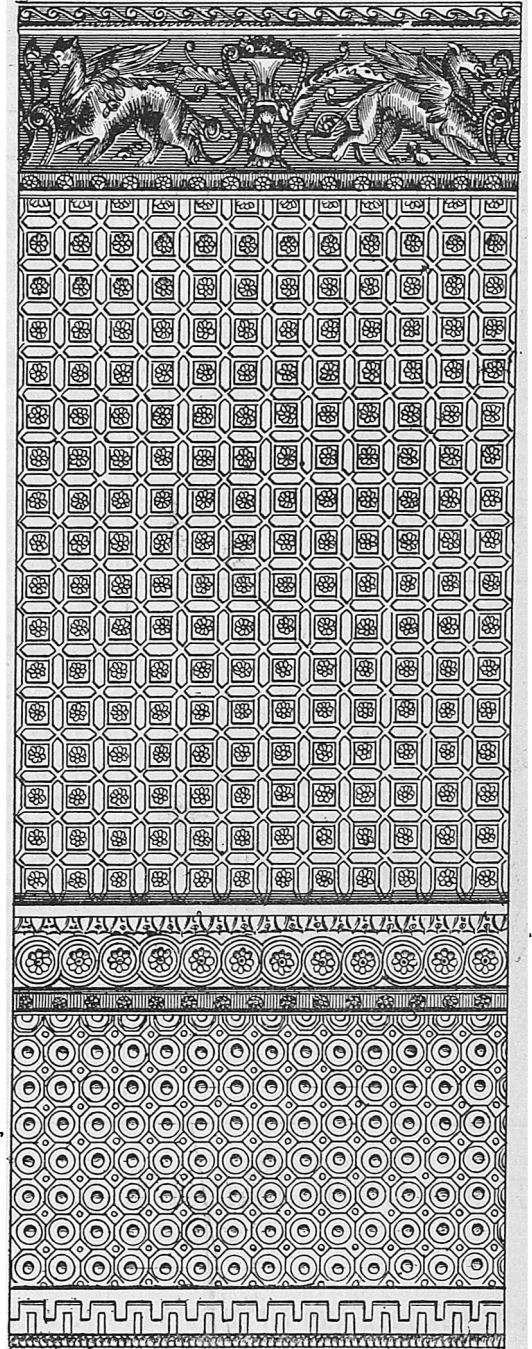

Wainscoting, Friezes, Borders, Panels, Vignettes, Ornamental Centre Pieces, Carvings, Mouldings, Advertising Signs, Letters and Figures, and Corner Scrolls for Signs, &c.

Ceiling in Fire-Proof Stereo Relief.

A Dado in Fire-Proof Stereo Relief.

Wall Filling, Dado and Frieze in Fire-Proof Stereo Relief.

### The Stereo Relief Decorative Composition.

THE Stereo Composition can be moulded into an infinite variety of artistic forms, in pure white or in tints, and can be gilded, silvered or bronzed, thus readily reproducing or duplicating any desired design furnished by architects or decorators. This substance contains no oil, white lead, or other inflammable material, and is absolutely fire-proof and sanitary. It is not affected by contact with water or by any sudden change of temperature.

Its expense is less than that of any other artistic decoration, and it fully equals the best in beauty, while it surpasses all others in the essentials of Strength, Lightness, Adhesiveness and Non-Inflammability.

It is admirably adapted for the decoration of churches, theatres, public halls, hotels, restaurants and private residences; and, as a substitute for paint, paper, frescoing, kalsomining or other hard finish, it is infinitely more economical—quality and durability being considered.

### Stereo Relief Friezes, Dadoes, Panels, Etc.

The Company has always on hand a large and elegant assortment of friezes, wall fillings, borders, panels, dadoes, rosettes, etc., etc., in relief, manufactured from its Stereo Composition. This material is far superior to papier-maché, or plaster; is light, but strong and substantial, and admits of the application of any desired style of ornamentation. These decorations, embracing entirely new designs, are made in very high, as well as low relief, and are readily and safely handled.

Your attention is especially asked to the fact that our work is complete before it is sent out from our factory, and can be put up by any workman in the decorative trade, thus enabling our patrons who are at a distance to render perfect satisfaction to their customers.

The high relief in which this new composition can be produced forms one of its prominent features, an elevation of six or eight inches being as readily shown as one of half an inch. And, as the material is cast in flexible moulds, a perfect under-cut—that great desideratum of artistic relief work—is obtained with ease. In representations of heads and figures, a life-like resemblance is effected; and architectural details are also followed with a similar fidelity; while in fruits, vines and flowers, the grace, beauty and pose of nature are retained, and the stiffness and preciseness of stamped work, such as the Lincrusta-Walton or papier-maché, are avoided.

In conclusion, we claim that there is a great public need of productions such as ours, and we believe that, in our new material, we have reached the desired point of perfection.

Pre-eminent in all elements of decoration, and its development and practicability established beyond peradventure, we most respectfully ask your co-operation in the ultimate establishment of the Stereo Relief Decorations as a leader for all kinds of wall and ceiling ornamentation.

We invite correspondence, and, having no fear of competition, shall be glad to furnish estimates promptly. Personal inspection of our work is solicited, as well as a visit to our factory and salesroom.

## Prize Competition on Interior Decoration

ONE HUNDRED AND FIFTY DOLLARS TO BE GIVEN AWAY IN PRIZES!

Messrs. JOSEPH P. McHUGH & Co., Interior Architects and Decorators, New York, offer six subjects for competition in THE DECORATOR AND FURNISHER, beginning with the October, 1890, issue. A prize of Twenty-Five Dollars will be paid by the above firm, every alternate month, for the space of one year, for the best original design, in the following special styles of ornamental construction and decorative treatment.

—SUBJECTS FOR COMPETITION—

1891—June, AN ADAMS LIBRARY.

" August, A LOUIS QUINZE BOUDOIR.

For the conditions of the competition, see the announcement on first page of the present issue of THE DECORATOR AND FURNISHER.

The attention of Manufacturers, Designers, and our Art Amateurs is called to this important announcement, and we trust that designers of merit will grasp the opportunity of bringing themselves and their work to public notice.

**ONLY DIRECTORY ON EARTH**

Guaranteeing 50,000 Circulation. For 10cts. (silver) your name will be inserted and copy mailed you accompanied by positive proof that your name is sent to 50,000 Publishers, Advertisers, Mfrs. and others, and from these you will receive hundreds, probably thousands, of valuable Samples, Papers, Books, Magazines, etc. ALL FREE. Always address AMERICAN DIRECTORY CO., Buffalo, N. Y.

VERNON HILL, VA.—GENTS: I have already received over 1,000 parcels of mail, scores of magazines, etc., for which I had often paid 25c each before. My experience proves your Directory far exceeds all others, as I find most of them are frauds and cheats. R. T. JAMES.

Subscribers to the DECORATOR & FURNISHER will also find

Rowell & Co's Newspaper Advertising Bureau to the amount of Ten Dollars he will be allowed a discount sufficient to pay for a year's subscription to PRINTERS' INK, a journal for advertisers, issued weekly at \$2 a year.

**Bricks, Tiles, Terra Cotta, Etc.**—Clay is used in many different forms by the builder after it has been burnt or baked. The more important forms are bricks, fire-bricks, terra cotta, stone ware, etc. The earth used for making ordinary bricks consists of alumina and silica, alone or in combination with other substances such as lime, magnesia, iron, etc. These earths are classified as follows: Plastic or strong clay, loams or mild clays, and marls or calcareous clays. A good brick earth should contain sufficient flux to fuse its constituents at a furnace heat. The quantity of clay required to make one thousand bricks ranges from one and three-fourths to one and one-half cubic yards, measured after digging. Most hand made bricks have a hollow on one of the larger faces to afford a key for the mortar, and should be laid with the hollow uppermost. Bricks are divided into three classes; cutters or rubbers, ordinary bricks, and underburnt or misshaped bricks, and they are all colors and varieties. Good bricks should be free from cracks, flaws, lumps or stones of any kind, uniform in size and regular in shape. If the proportion of water absorbed be small the brick is good. The best method of testing bricks is to see if they ring when struck together.

**To Renovate Leather.**—(1) Use brown, hard varnish 2 parts, French polish 1 part; well mix. (2) Black Japan, thinned with turps. For a leather varnish, well clean the leather using warm water, (no soap); when quite dry apply either of the above varnishes with a camel hair brush. The varnishing should be done in a warm room, near the fire, and quite free from dust. No. 1 will make the leather dark brown, No. 2 nearly black.

**A good Mastic Varnish** may be made by taking 4 oz. of gum mastic in powder, 2 oz. gum copal (selected), powdered glass 4 oz., pale linseed-oil 8 oz., rectified spirits of turpentine 1 1/2 pints. Put the gum with the oil and glass into a copper or porcelain vessel, heat by a sand bath, and stir till dissolved. Then add the turpentine while cooling. Should the contents of the vessel become inflamed, throw over it an old sack or piece of carpet, or else a handful of ashes; better lose the contents of the pot than set the place on fire. An old saucepan lid filled with sand makes a capital sand bath. This article is used so as to regulate the heat, and keep it at a uniform temperature.

**Curious Property of Plate-Glass.**—Many years ago, in putting glass into a mansion close by the sea shore, says a correspondent, I could not at first understand why in one room facing the sea I heard the sound of the waves beating on the beach, while in an adjacent one no sound was heard. After musing on the circumstance, I saw that the one room was glazed with thin sheet glass, while the other had thick polished plate. Now if a bachelor will get his window glazed with the latter material, he will have gained a step; but he can also get an outside frame similarly done, and made to fit between the stone—hinged if he likes. Over his room door, too, let him put a pole, and hang upon it heavy curtains by means of rings. He will then be secure from din and all the evils he wants to get rid of.

To the Publishers of

"The Decorator and Furnisher",

City

Gentlemen:-

We think it only fair to you to state that we have found "The Decorator and Furnisher" to be the best medium for advertising our business amongst the many journals in which we have advertised for some time past. The returns and inquiries received in reply to our advertisement in your journal were more than the returns from our advertisements in all the other journals put together. An effect so gratifying as this ought to be made known to you, and you are at liberty to make any use of this letter that you think proper

Very truly yours,

THE STEREO RELIEF DECORATIVE CO.

ESTABLISHED 1837.

## DECORATION

of wall surfaces has now become one of the Fine Arts. The combination of fine color effects with good designs is requisite to the completion of good work. To meet the demands of the present time, the manufacturer must spare no effort in procuring the best talent at command.

**THE BOSTON WALL PAPER CO.,**  
with its large number of designers and colorists, are doing this season some splendid work which they will be pleased to show to the trade for the Fall Season.

Correspondence may be directed as usual to

**THE BOSTON WALL PAPER CO.,**

WM. A. CORSE, Manager.

20 SUMMER STREET, BOSTON.

**PAPER  
HANGINGS.**

YOU are often disappointed with the effect on the wall of the Paper Hangings you have chosen. A pattern of one make is selected for the Side wall, a Frieze and Ceiling of another. The result is a patchwork of ornament that is very unsatisfactory.

All the Paper Hangings that are manufactured by M. H. Birge & Sons are made in Sets or Combinations; a Side-wall, a Frieze and a Ceiling pattern, all designed and colored by skilled interior artists, to harmonize and correspond. They are made as complete decorations, and by their use you can secure satisfactory and artistic interiors.

Ask your dealers for the BIRGE papers. Their name or trade-mark is plainly stamped on each roll; or address factory at Buffalo, N. Y., or New York City Showrooms, 1155 Broadway, Rooms 4 and 5.

## ARTISTIC HANGINGS.

We shall be glad, at all times, to submit designs and samples of interior decorative hangings; to prepare plans and estimates for draperies in single rooms, apartments, country houses, halls, and churches.

We furnish the best church pew-cushion that can be made.

Scarfs, Table Covers, Piano Covers, Lambrequins, Panels always in stock.
